Expedited to you as an expectable best-seller is the attached just-printed Topography for North Viet. (The General Survey came out in September.) I have expedited a copy to the DIA member of the Committee with request that he pass to Maples with suggestion that it would be fine if this be passed to Generals Taylor and Carroll with judicious low-key making of the point that chances for this kind of advantageous timing are substantially reduced by the cut-back in Topography production. You will note Section has all but been eliminated from the cover.
